

Steps to setup ESP32 on the computer:

- 1- Connect the ESP32 to your device (PC, LABTOP)
- 2- File → preferences → write the URLs (https://dl.espressif.com/dl/package_esp32_index.json)
- 3- Go to Tool → board → board manage → write in search bar (ESP32) → click install
- 4- Tool → board → ESP32 → WEMOS D1 MINI ESP32
- 5- Go to Tool → port → COM
- 6- File → example → basic → blink (to show the code) and run it
